Dear Talent Acquisition Advisors,

About me

As part of my professional career starting out in food engineering, I've always been interested in innovative companies. I had the chance to do internships in companies such as the Dominion & Grimm, Sucre Lantic and Happy Yak. I deepened my knowledge of operations in food manufacturing companies.

As a new graduate in food engineering and future graduate in computer science, my academic training allowed me to know several software and their applications directly in companies.

Why your compagny?

You are cool!

Why me?

I'm cool!

Hope to meet you soon,

Marc-André Labelle
